HTML & CSS No.1

Give a brief explanation of each of the following, explaining with code examples (Iframes , meta , layout , link , embed , Emojis) upload your
* explanation with page codes

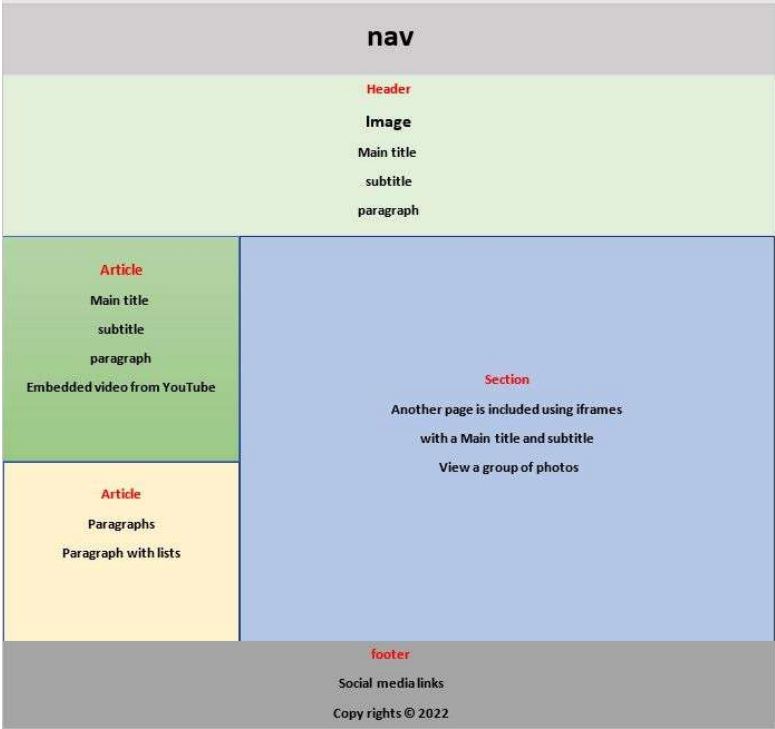

...urad Hassan.txt 

Using only Html to Design a page for a technical or medical blog, taking into account the design of each part as shown in the image :

- In the nav area, make a list containing "home, pages, gallery, about, contact"
- In the header area, display an image with a headline and sub-title
- In the area article1 a headline and subtitle are included and below them include a YouTube video
- In the section, another page is included using iframes with a main title and sub-title, and then a set of images below them
- In the article2 area, an explanation is made in the form of a long text and a list after it
- In the footer, add a set of links to social networking sites, then at the bottom © Copy rights 2022 and any special additions footer .
- Upload your work to GitHub and include it * in GitHub Page and put the link below
